

Vedant Daigavane

MERN Stack Developer | Day Trader

I am a highly enthusiastic and competitive person who likes being around people who like to test my limits and I try to push theirs as well. I love to acquire new skills and share my knowledge. Taking up complex challenges and leaving simple ones is my passion. I don't like to stick to one technique for a longer time and quickly look for other ways to do a task. I strongly believe that being the jack of all trades and master of none is always better than being master of one.
